Whom it may concern,

I am a retired Army veteran who resides in Doe Valley KY. We have a water company (Doe Valley Inc.) and requested for permission to build a better treatment plant. Our Utility company request to you and a meeting was scheduled for a hearing on the 27 Jan 04 to be able to complete the desired wishes of the community. There was 4 surveys conducted over the last 2 years and overwhelmingly the build of a new plant using the membrane technology was agreed upon. Now that the community had a meeting with the current POA Board (who removed the utility board and appointed themselves as the new board) on the 26th and they informed us that the PCS was in the business of ordering communities on now to organize.

What I mean by this is that on the 26th the POA informed the community that they replaced our utility board with themselves based on an **order by you the PSC**. Now that there is a meeting with them on the 6th of Feb. 04 maybe you can ask them to explain their actions by using your organization as an excuse for their actions. Our community is in term oil and they feel you are the problem. I think you need to have the real problem (the current POA broad and self appointed utility board) have to explain their actions in writing to you before you proceed with any progress on our water issue and have it posted the web site and a letter of explanation sent to the customer base of the water company.
